We warmly welcome you to visit our tea garden in Angus, located in a beautiful setting on our working family farm approximately 10 miles north of Dundee.

We produce limited quantities of Scotland's first ever 100% pure black tea. This is hand-rolled from leaf plucked from our 9 year old bushes growing in polytunnels. In 2016 we rejuvenated our old walled garden by planting 4,000 Nepali tea seedlings that will be ready to produce tea by 2020 once the plants mature. This year a further half-acre of Georgian seedling tea is to be planted out to be ready to pluck in 2022.

The cost of a tour is £25 (plus vat) per head and the minimum tour size is 2 people. Our tour will take 2 hours and you will have the chance to see our tea, be shown how to pluck, see how the tea is rolled and learn about our Tea Gardens of Scotland project. There is also a tea tasting.
